

First piles in Rainbow II expansion project

We are pleased to announce that the first piles out of a total of 1300 were successfully driven into the tank pits last week.

This is undoubtedly the first of many milestones to come in our project to further expand the terminal at Rotterdam-Botlek, elevating its storage capacity up to 180,000 m³.

LBC Tank Terminals currently owns and operates seven terminals located in Houston, Freeport, Baton Rouge, Antwerp and Rotterdam with a combined storage capacity of 2.5 million m³, serving over 100 customers including all major players.

Our goal is simple: we aim to provide our customers with the safest, most reliable and efficient tank storage and logistical solutions.
